

About Us - Brydan Solutions Inc

Brydan Solutions was founded in 2002 by Scott Bebber. It has continued to grow over the years from his small home office. In September 2004, Brydan Solutions was incorporated in the State of Nevada. Brydan Solutions, Inc now consists of a talented group of jack-of-all-trades technicians. With decades of experience in various aspects of IT Services and Consulting, these technicians wanted to provide a one-stop service-oriented technology firm that brings customer service and goals to the forefront. Brydan Solutions customer centric outlook allows them to analyze a customers needs and goals, and provide a real working solution for their problem. What separates Brydan Solutions from the other IT Service & Consulting firms is they really care about the customers situation and they will make a genuine effort to provide an attainable solution.

Specializing in IT Services & Consulting for the small and medium size business; Brydan Solutions can assist with consulting, IT service & maintenance contracts, Business Continuity Services for Disaster Recovery, Hosted Exchange, Hosted CRM, Hosted SharePoint, Hosted Servers, hardware rollouts, computer repair, software configurations, server installations & migrations, network administration, firewall, security, virus & spyware removal, data recovery, file recovery, data backup solutions (on-site and off-site), VoIP solutions, web presence (domain registration, SSL certificates, SEO services, hosting, & web development) and application (software) development. Their experience, knowledge, pride, confidence and desire to succeed creates a cohesive technology team that wants to do a great job for you. They want to become "Your Technology Partner".
