

## Hosted Servers

### Server Hosting Services:

Server hosting that is secure and dependable.

If you're committed to keeping your servers fully operational and maximize uptime, then work with Brydan Solutions. Host your rack servers within our solid infrastructure that's built with redundancy, security, and performance. We offer rack space and bandwidth to host your rack server, or you can rent one of our pre-configured rack servers in one of our racks at a fully secure data center.

Benefits include:

- The ability to quickly scale your solution and bandwidth  
as your business changes
- Flexibility - Flex hosting may include managed services
- Reduction in capital expenditures
- Equipment that is protected in a safe and highly-secure data  
centers
- 24x7x365 support

### Exceptional support

Our hosted server services include the environment, power, bandwidth and exceptional support.

• Provisioning and installation management helps alleviate the process-intensive and often time

consuming responsibilities with the installation process

- Remote support enables you to call upon your skilled technology team to help with a wide range

of projects, from simple server reboots to complex hardware configurations.

#### Flex Hosting:

Customizable solutions that provide flexibility and unparalleled support. What you need the way you need it. Flex hosting is simple. We provide you with what you need the way you need it. If you prefer to own your hardware and purchase managed services, such as Server Management and Support, you can do so through our Flex hosting solution. Should you prefer to own and remotely manage some of your servers as well as purchase fully managed equipment, Brydan Solutions will support your solution as if it were one large environment. Through the level of flexibility and support provided by our Flex hosting solution, Brydan Solutions can truly become an extension of your IT and business management team.

#### Internet/Bandwidth:

Internet access has never been so easy. Brydan Solutions can deliver bandwidth to your hosted servers in a snap. We can provide dedicated IP's on a shared or dedicated bandwidth plan.

- "Dual everything" network infrastructure
- Reliable uptime, 95%+
- BGP4 routing
  - Real time traffic monitoring
  - Immediate response to emergencies
- 24/7/365 monitoring
